

DANA VALANCE

©2004 Pate-Meadows Designs, Inc. (Rev. 6/06)

- This elegant valance with sash and buttons can be adapted to fit various window widths. Our pattern, as is, makes a valance that is 42" finished width. The finished length of the valance is approximately 22 inches at the center and approximately 25 inches at the sides.
- This valance works best when constructed out of a medium to heavy-weight decorative fabric for the face fabric. We recommend a light-weight fabric, such as silk taffeta, for the sash.
- The valance has a slightly shaped bottom with facings at the top and bottom.
- Use a drapery interlining to give the valance the best body and shape. Interlining is a flannel-like cotton fabric that hangs between the face fabric and the lining. It is available in white and natural colors and can be found at most decorative fabric stores or at www.patemeadows.com. It is *not* the same thing as interfacing.
- The valance in the picture is mounted on a 1 x 6" dustboard. You can use either a 1 x 4" or a 1 x 6" board.
- A small piping is applied to the top and bottom of the valance. We also applied a decorative trim along the bottom of the valance.

MATERIALS

These amounts are for a valance measuring 42" wide finished. See chart below for other window widths. These amounts are based on 54" wide fabric. Allow extra fabric to match patterns and plaids.

Fabrics:

- 2 yards of decorative fabric for valance front.
- 1 ½ yards of drapery lining, ivory or white.
- 1 ½ yards of drapery interlining (www.patemeadows.com)
- 1 ½ yards of fabric for sash
- 1 ½ yards fabric to cover buttons and piping.

Supplies:

- 6 yards of 4/32"-diameter cotton piping
- Temporary fabric marker
- 7 cover-your-own buttons ¾" diameter
- Hot glue gun
- Steam-A-Seam2® - ½" (www.patemeadows.com)
- Tufting twine or white nylon braided twine (found in fishing department)
- 3 yards of decorative trim for bottom of valance (optional)
