

MADELYN VALANCE

©2002 Pate-Meadows Designs, Inc. (Rev. 6/06)

- This fully lined and interlined, tailored valance with pleated underskirt can be adapted to fit any size window. The finished length of the valance is approximately 22" in length.
- This valance works best when constructed out of a medium-weight decorative fabric with medium to lightweight contrasting fabric for the pleated underskirt.
- The gusset section and side jabots are self-lined in the same fabric as the face fabric with a small covered piping along the bottom edge. The swag sections are lined in regular ivory or white drapery lining; however, a decorative trim or piping should be added to prevent the lining from showing at the bottom of the treatment. The pleated underskirt is attached to regular ivory or white drapery lining.
- Use a drapery interlining to give the valance the best body and shape. Interlining is a flannel-like cotton fabric that hangs between the face fabric and the lining. It is available in white and natural colors and can be found at most decorative fabric stores or at www.patemeadows.com. It is *not* the same thing as interfacing.
- This valance is mounted on a dust board. Either a 1 x 4 or 1 x 6 can be used depending on the projection desired.

MATERIALS

*These amounts are for a valance measuring 42" wide finished. See chart below for other window widths. **These amounts are based on 54" wide fabric. Add extra fabric for matching of patterns.***
