

SADIE VALANCE

©2014 Pate-Meadows Designs, Inc.

- This charming awning valance is a great choice for any room including kitchens, bathrooms, sunrooms, laundry rooms, and kid's rooms. It features a shaped bottom and piping made out of contrasting fabric. The pattern, as is, will make a valance that is 44" wide, but it can easily be adapted to fit different width windows. The finished length of the valance is approximately 19 inches and projects out from the wall about 8" at the bottom.

- This valance works best when constructed out of a medium-weight decorative fabric.
- If you are using a lighter weight fabric, we suggest using drapery interlining to give the valance the best body and shape. Interlining is a flannel-like cotton fabric that hangs between the face fabric and the lining. It is available in white and natural colors and can be found purchased online at www.patemeadows.com. It is **not** the same thing as interfacing.
- The top of the valance is attached to the wall using a 1" x 2" board. These are available at most home improvement stores. They usually come in 8 foot lengths and are referred to as 1x2x8 furring strips. For the bottom of the valance, you will need a special valance rod with a clearance of 8". These valance rods are available from www.patemeadows.com

Supplies

- 1"x2" board (furring strip)
- Hacksaw or jigsaw to cut board
- 1-1/2" angle irons**
- Hook Tape (stick on)**
- Loop Tape (sew on)**
- 4/32"-diameter cotton piping**
- Valance rod with 8" clearance**

**Available at www.patemeadows.com
